

The Cashew Value Chain: African Cashew initiative

Mary Adzanyo; Director Private Sector Development

ACP Symposium; 11 February 2016

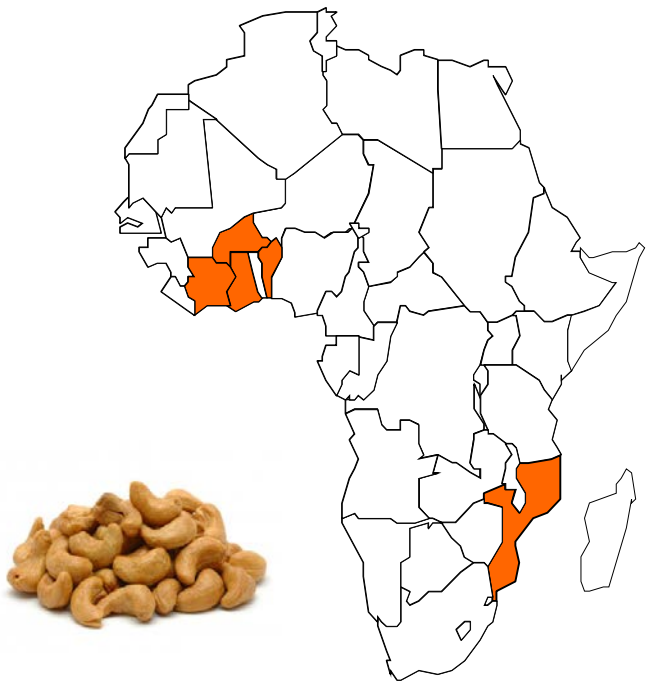

ACi works in five countries along the Cashew Value Chain: From Farm to Fork, A Win - Win Situation for all

Each section of the chain offers jobs to the local communities (men, women & youth)

ACi in South-South & Triangular cooperation along the cashew value chain from inception of the project

ACi Vision until April 2016: Enhancing productivity and thereby increasing the annual income of small-scale farmers and processors.

430.000 farmers increase their family income by **\$600** (\$110 net) annually from cashew production; creating an accumulative additional income of **\$250 Million** (\$100 net) until April 2016

Objective

Production

'Increasing raw cashew nut production and quality'

Objective

Processing

'Increasing quantity and quality of African cashew kernel and cashew by-product processing'

Objective

Supply Chain Linkages

'Establish and expand sustainable links to the global market place'

Objective

Sector organization

'Advocate policies that favor cashew production and processing'

A Strategic Alliance of Private and Public Partners ensures sustainable and market-driven implementation of activities

Funding, Contributing and Implementing Partners (16)

Public

Private

CSO / NGO
