ONGOING PROGRAMMES

**Fit For Market (FFM, FFM SPS, FFM+)**

**ICR Facility**

**ACP Business-friendly**

**FO4ACP**

**DIRECTCT**

**ACP Quality Infrastructure**

**Business ACP**

DESCRIPTION OF INTERVENTIONS

**Fit For Market (FFM)** programmes support companies in the horticultural sector and their environment to ensure their international access to horticultural and national markets while complying with sanitary and phytosanitary regulations and market requirements, individually or collectively. Support includes food safety, environmental management, social compliance and business management. The main types of support are related to the implementation of a management system (on social themes, environment, quality) meeting the requirements of international certification standards required by customers (GLOBALG.A.P., HACCP, Rainforest Alliance, SMETA, etc.). Set up in the continuity of FFM past programmes, the new FFM Plus (FFM+) programme support is tailored to facilitate the transition of ACP horticulture towards more sustainable food systems, addressing the priority areas identified in the Farm to Fork strategy of the European Green Deal.

In the Caribbean, COLEAD and the **Caribbean Agribusiness Association** have signed a Memorandum of Understanding aimed at promoting and strengthening the development of agribusiness in the Caribbean, improving competitiveness through increased capacity to produce better quality food and more secure, better market access and strong business and management skills. The **FFM SPS** programme has trained and awarded certificates to 661 participants from different countries’ public sector services (including from the Caribbean) that implement improved SPS analytical, control and enforcement procedures for local and export markets.

COLEAD, through FFM and FFM SPS, in collaboration with the **Inter-American Institute for Cooperation on Agriculture**, has launched the **Caribbean Agrifood Business Series** to support a more resilient and greener agricultural and agrifood business sector in the Caribbean.
DESCRIPTION OF INTERVENTIONS

This Caribbean Agrifood Business Series aims at (i) exchanging ideas and best practices on selected priority issues; (ii) showcasing successes of smallholders, businesses and micro, small and medium sized enterprises (MSMEs); (iii) promoting and documenting forthcoming innovations and technologies benefiting smallholders and MSMEs; (iv) promoting networking amongst various stakeholders in the food chain; and (v) disseminating research findings. In June 2021, a third virtual training course on implementing official controls was provided for inspectors in the Caribbean by FFM SPS. Inspectors from Guyana took part in the training, including participatory group assignments and presentations.

ACP Business-friendly is designed to achieve two key outcomes:

- Adopting and implementing business-friendly, inclusive and responsible national policies and legal frameworks.
- Strengthening productive, processing, promoting and marketing capabilities and value chains.

In 2022, ACP Business-Friendly programme and the Caribbean Association of Investment Promotion Agencies (CAIPA) continued their collaboration to extend technical assistance support to Caribbean Investment Promotion Agencies (IPAs) to promote investment in the region. In April 2022, CAIPA members were briefed about the UNIDO investment opportunity development approach, including reference to the UNIDO investment promotion toolkit and methodology. CAIPA members were asked to indicate their interest for closer collaboration to coach IPAs in the development of investment opportunity profiles using the UNIDO methodology.

The ACP Quality Infrastructure (QI) programme supports ACP policy makers, institutions and private sector actors to (i) enhance the regional Quality and Regulatory infrastructure governance; (ii) strengthen the availability of the value chain-specific QI services; (iii) promote quality culture and practices. The programme complements and builds on the ongoing achievements of the ACP Business-Friendly programme reinforcing the UNIDO’s programme action. ACP QI was officially launched in the Caribbean at the 41st Meeting of the CARICOM Regional Organisation for Standards and Quality (CROSQ) Council, in October 2022.

FO4ACP Farmers’ Organizations for ACP Countries programme aims to increase the incomes and improve the livelihoods, food and nutrition security, and safety of organized smallholders and family farmers by strengthening regional, national and local farmers’ organizations. One of the key areas for intervention in the region is the development, strengthening and consolidation of technical advisory services and training systems.
DESCRIPTION OF INTERVENTIONS

At regional level, the programme supports also the mapping and systematization of information related to farmers’ organisations. This mapping exercise provides key insights into the legislation and institutional rules governing the establishment of farmers’ organisations, unions or associations in different countries. In collaboration with PROCASUR, an interactive online platform was developed to create an innovative learning environment for training programmes addressing farmers’ organisations. The platform is an important tool for sharing experiences, knowledge and good practices directly among peers. Under the FO4ACP programme, FAO and PROCASUR undertook the mapping of 30 farmers’ organisations whose membership range in size from 7 to 700 producers.

The ICR Facility supports private and public stakeholders and regional institutions to improve their investment climate and business environment by facilitating public–private dialogue, among other actions. At regional level, the programme supported the Caribbean Export Development Agency (CEDA) in an analysis of the credit reporting infrastructure in fifteen CARIFORUM countries. The intervention provided an in-depth assessment of credit bureaus and collateral registries in the region, and highlighted opportunities for reform at the regional level. In addition, the Caribbean Association of Investment Promotion Agencies (CAIPA) received support to analyse the insolvency frameworks around the region. The ICR Facility supported the Caribbean Development Bank (CDB) in structuring its private sector lending and in assessing the supply chain and trade finance facility feasibility for the Caribbean region.

DIRECCT (Digital Response Connecting Citizens) is implemented jointly by Agence française de développement (AFD) and the Belgian development agency, Enabel. In the Caribbean, DIRECCT supports the Caribbean Public Health Agency (CARPHA), which is setting up a unified system for collecting and managing public health data in the countries of the Caribbean community. This investment in the health security supports integration of real–time digital surveillance systems to enhance risk assessment, monitoring, prevention and control of established infectious diseases and new and emerging public health threats by CARPHA and CARPHA Member States. CARPHA also coordinates capacity–building of Member States’ Ministries and Authorities of Health to implement these systems for local, sub–regional and regional surveillance, with a focus on gender equity and human–centered technology. Another activity undertaken at the Caribbean regional level is the Virtual E–Commerce Accelerator Programme (VEAP), implemented by Caribbean Export (CEDA).
DESCRIPTION OF INTERVENTIONS

VEAP is aimed at building capacity of Business Support Organisations (BSOs) and firms to adopt e-Commerce technologies and processes leading to broader and more effective market reach, customer engagement and export sales.

**EURIZ** guarantee helps to increase credit accessibility for MSMEs, by engaging in cooperation initiatives with a wide variety of financial institutions. Implemented by PROPARCO (AFD Group), EURIZ covers agricultural and agri-business, health, education, digital, and microfinancing companies owned by women or young people, who are facing increased difficulties in accessing finance. In 2022, the programme reinforced the offer of the EURIZ guarantee and developing activities in the Caribbean region.
